

Foxberry expands thematic index range for new ETFs

Press release

London, 3 September 2020: Foxberry, the provider of financial indices and front office technology for the financial sector, today announced the expansion of its thematic index range with two new indices licensed to Rize ETF.

The two new thematic ETFs track the Foxberry Tematica Research Sustainable Future of Food Net Total Return Index and the Foxberry HolonIQ Education Tech & Digital Learning Net Total Return Index. These two new Foxberry indices have been developed in collaboration with specialist research houses.

The premise of the Foxberry Tematica Research Sustainable Future of Food Net Total Return Index lies in the well-documented global challenge of providing healthy, affordable and nutritious food to a growing global population, while at the same time reducing harm to the environment. The index utilises research from Tematica Research.

The Foxberry HolonIQ Education Tech & Digital Learning Net Total Return Index offers exposure to companies which are redefining how education is accessed, resourced and consumed around the world to deliver positive results for the individual and society, and is based on research from HolonIQ.

Jason Kennard, Co-Founder of Rize ETF commented: “Using Foxberry’s sophisticated technology, and its ability to work quickly with large datasets, and iterate on concepts, we have been able to bring these innovative ETFs to market in record time, capturing the themes early in their cycle.”

Henrik Brunlid, CEO of Foxberry added: “To capture the essence of thematic investing, it is clear that data management, construction and speed-to-market are essential. We are pleased to expand our thematic range and facilitate the launch of these new ETFs.”
