

# Foxberry raises \$100mm for LeCap Asset Management's new equity market neutral sustainable fund

## Press release

**London, 2 October 2019:** Foxberry Ltd has successfully sourced in excess of \$100mm for LeCap Asset Management's new sustainable fund.

LeCap Global Equity Fund follows a strategy that aims to be uncorrelated by investing systematically in an equity portfolio intending to replicate the performance otherwise achieved by large teams of discretionary fundamental Equity Long/Short managers.

The sustainable agenda is embedded in LeCap's investment process with the dual objective of reducing the associated risks to the portfolio and positioning it for a positive impact. For example, the strategy excludes the following industries: energy equipment & services, oil, gas consumable fuels, metals & mining, electric utilities, gas utilities, multi utilities, aerospace & defence and tobacco.

LeCap's investment model has been refined by CIO Christian Dalban over many years as he built and led large multi-PM investment units at BlueCrest, Nomura and Millennium.

David Sahlin, Chairman at Foxberry commented: "Sustainability is high on the agenda of our clients, and we are committed to enable sustainable investment strategies. We are pleased to raise capital for LeCap's actively managed fund."
